

If you are considering the move to flex or rigid-flex PCB designs, then Circoflex is well positioned to help you in that process. Our new, state-of-the-art design and production facility is centrally located in Toronto to serve both Canadian and US clients. We can provide your company with rapid prototyping (in as little as 48 hours), functional testing, component sourcing, JIT inventory management and if needed will migrate your product to our 500,000 ft², ISO-9001 Taiwan fabrication facility designed for high volume output at 14-21 day deliveries. Our customer focused approach ensures flexible and responsive working relationships, quality products, competitive pricing and on-time delivery.
